

GREAT SOUTHWESTERN
CONSTRUCTION, INC.

**AFTER HIGH SCHOOL,
THERE ARE MANY PATHS
TO SUCCESS.**

**CONSIDER A CAREER IN THE EXCITING
ELECTRICAL CONSTRUCTION INDUSTRY**

IMAGINE YOURSELF

WITH A REWARDING CAREER IN THE ELECTRICAL TRADE

Are you a hands-on learner? Do you get excited about the prospect of getting out of the classroom? Do you want to start working right after high school while learning a trade?

Great Southwestern Construction (GSWC) proudly **offers three paid** Department of Labor Bureau-accredited **apprenticeship programs** and career opportunities within our company which may be right for you!

Our apprenticeship combines work-based learning with related classroom instruction using the highest industry standards. Our paid apprenticeships help start your electrical career in the exciting field of **transmission linemen, distribution linemen** or **substation technicians!**

BENEFITS OF AN APPRENTICESHIP

High school graduates eligible for direct-hire

Demand for skilled workers on the rise

No student debt – 100% paid for by GSWC

Earn wages WHILE receiving high quality hands-on training

Average annual wage for someone completing apprenticeship is ~\$50,000

Opportunity for long-term career advancement and well-paying jobs

Reimbursement under the GI Bill for Veterans

**HELP BUILD THE ELECTRICAL
INFRASTRUCTURE THAT
POWERS OUR NATION**

WHY A CAREER WITH US?

Since 1977, Great Southwestern Construction, Inc. (GSWC) has built more than the electrical infrastructure that powers our nation, we've built strong and dedicated employees who have fueled our continued success.

Investing in those who invest in us is what makes our company so unique, and is something we are extremely proud of. We understand that providing a satisfying work environment helps us to get the most out of our people, and is what ultimately leads to personal achievement.

EXPLORE THE POSSIBILITIES

IN OUR ELECTRICAL CONSTRUCTION TEAM

Great Southwestern has over four decades of successful electrical construction projects for utilities, municipalities, government entities and private developers throughout the nation for transmission lines, distribution systems, communication systems, substations and renewable energy facilities.

Our folks that have been doing this a while have a tremendous sense of pride about what they do; describing their work as challenging and inspiring. At the end of a project, it's a good feeling to know that you were part of something big...something that helps people.

ANTELOPE VALLEY TO JUDSON

144-mile, 345kV, single-circuit transmission line in North Dakota utilizing a "Kaiser" walking mobile excavator.

Transmission Construction & Maintenance

Substation & Switchyard Construction & Maintenance

Distribution Construction & Maintenance

Emergency/Storm Restoration Services

Renewable Energy

Engineering, Procurement & Construction Services

Foundation & Civil Construction

Pre-Construction Services

CROSS TEXAS TRANSMISSION

Construction of 235 miles of double-circuit 345kV transmission line and 1,400 structures throughout Texas.

MAGIC VALLEY WIND FARM

EPC project to construct 258,000 circuit feet of a 34.5kV underground collection system and new 138kV substation.

WHAT DOES THE FUTURE HOLD IN THIS INDUSTRY?

High employment projections

Growing, nationwide need to **build and repair infrastructure**, creating a **higher demand for electrical construction-related jobs**

New investments in **innovative, smart and sustainable technology** are **transforming the future**

High rate of retirements and turnover expected in the industry, prompting **demand for new skilled workers** to enter the profession

Alternative power generation, such as solar and wind, is an **emerging field** that **will require more workers** for installation and to link these sources to power grids and homes

WHAT OUR EMPLOYEES SAY

Joseph Burris
Apprentice

“To start a great career you might want to consider starting an apprenticeship. When I started mine I was just getting out of the military but even if you start right out of school you won’t have any bills and/ or little to no debt. You can’t beat the great money you will earn in this industry right out of high school with no college degree. Instead of paying for knowledge you can get paid for knowledge instead, just think about that.”

Josh Whitelaw
Project Development

“The apprenticeship program at Great Southwestern Construction has enabled me to receive the training needed to excel and move up throughout the company. I started with Great Southwestern Construction almost 6 years ago as a groundman. With the hands-on training I received, combined with the knowledge provided in the apprenticeship books, it has opened new doors and made it possible to move up within the company. The apprenticeship program is a great tool for anyone who is looking to further themselves and develop a long and lasting career.”

Jodi Glebe
Apprentice

“ I have an amazing crew, superintendent, and general foreman that assist me. The knowledge, reading materials, and hands-on training I receive has allowed me to thrive in this industry. I have been with the company for 7 years and I started out working in the office, but I got tired of being inside at a desk all day. I wanted to be out in the field learning, so that’s what I did. This career is a great fit for me. I just love wiring and I love being in the field! It has helped me to thrive personally. I don’t regret my decision at all and I hope to pave the way for other women in this industry. ”

Passion for what you do and knowing you make a difference you make a difference go hand-in-hand. At the end of a project, it's a good feeling to know that you were part of something big... something that makes a difference in people's lives...every day.

This could be you!
